

Minn Kota Bow Mount Motor with iPilot

\$3,260

We put Riptide® ST to the test, because we know you will. You need a motor that runs with a combination of stealth, silence and unrelenting toughness.Â

One that wonâ€™t spook fish, or back down from even the most extreme conditions. We know saltwater anglers never turn down a challenge. As it turns out, neither do we.

Supplied with i-Pilot® Wireless GPS Trolling System

i-Pilot® frees you up to focus on fishing. It uses GPS technology to remember paths and fishing spots on the water, activate cruise control, and give you command of speed, steering and Advanced AutoPilot®,.

- â€¢ Fully Encapsulated Electronics - Permanently protects electrical components from the harsh saltwater elements
- â€¢ Digital Maximizer®, - Delivers up to five times more running time on a single battery charge
- â€¢ Indestructible Composite Shaft - Stronger than steel. Flexes on impact, will not break, kink or corrode. Guaranteed for life
- â€¢ Weedless Wedge 2 - 100% weedless prop that provides full power for hassle free fishing
- â€¢ Stainless Steel Hardware - Provides an extra level of durability and corrosion resistance
- â€¢ Sacrificial Anode - Attaches to prop hub, eliminates corrosion on other metallic components and Riptide® trolling motors
- â€¢ Optional Foot Pedal - Corded foot pedal (602964) can be used in conjunction with the supplied i-Pilot® remote (602940)
