

Radar Butterknife Slalom Ski with Prime Boot

\$1,055

One of the most difficult parts about learning to efficiently turn a ski is understanding how to roll the ski's edge into higher angle. The higher the edge angle, the easier and quicker the ski will turn. With Butterknife, the sidecut and surface area were formed for stability and an easier roll into a higher edge. Turns are automatic and buoyancy is at a maximum with the largest surface area in its class. Effortless ups, light line tension and low spray. The easiest ski you've ever ridden. Now with All Terrain Core and a 100% carbon build!

KEY FEATURES:

- 100% Carbon laminates
- All-Terrain Core
- Recommended max speed 30mph
- RST (Radiused Stability Turn) Tail Shape
- Bent Vee fin

Â

PRIME BOOT

The Prime was designed with a lower cuff height and softer tongue for ease of entry and greater mobility. Being a member of the Feather Frame family, it offers greater performance than any other entry-level boot and is darn sure more comfortable. The only thing it's missing is a hefty price tag.

KEY FEATURES:

- Feather Frame Chassis
- Lower cuff height for the perfect amount of comfort and control
- Symmetrical Fit
- Double lacing system for a dialed fit
- Soft density footbed keeps your feet happy all day
- PVC free construction

BOOT SIZES: 5-8.5, Â 7-10.5, Â 10-14
